

I am sending you this request to not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Since signing up for the our state's Telephone Privacy protection earlier this year, the quality of my time at home has increased because I'm not constantly bothered by unwanted telemarketing calls.

I receive very few calls from telemarketers now compared to a least two per evening before I signed up for the protection.

The citizens of Indiana deserve the right to sign up for the Telephone Privacy law protection if they chose and should not have to rely on expense electronic gadgets, rudeness, or answering machines to protect them from unwanted invasions of their time and privacy.

Please leave the Indiana Telephone Privacy law alone!
